Our Sustainable Tanning Methods

Chrome and metal free leathers considering all sustainability parameters of leather production.
We reduce water consumption and TDS by 40%

Pure veg tannage from mediterranean olive trees providing high quality, biodegradable leather that is skin - friendly, free from heavy metals and save to work with.

Synthetic tannage that stabilizes the collagen to ensure a long product life. simultaneously the articles are kept natural to ensure biodegradability if required.

Lite leathers provide multiple advantages such as lower water and chemical intake, as well as an improved comfort through the reduced weight.

Sustainability put into practice

Our vision is the implementation of Best Available Techniques combined with our own in-house R&D innovations.

Sustainability is not a project for us, it is part of our company's DNA and can be found in all our daily business.

High quality and longevity are our set standards and lead to a lower environmental impact throughout the life-cycle of all our products.

Social Responsibility

Environment Responsibility

4 R's at Avanti Leathers

Reduce

- Water by 30%
- Chemicals by 30%
- Electricity use by 50%
- Amount of waste that goes into landfill

Reuse

- Reuse of wastewater through our special ETP
